

POWERVAC

With Dump Chutes

PD Blower Wet / Dry Vacuum Loader

Air Flow: 3800, 5400 or 6400 CFM
Full Vacuum (28HG)
Modular Filtration Optimized To Blower & Application
Blower Drive: OMSI Heavy Duty Transfer Case
Code Waste (Debris) Tank: ASME, DOT 412, TC 412, Dual DOT/TC, 35 PSI Max
Non-Code Waste (Debris) Tank: Heavy Duty Construction, Relief @15 PSI
Material: Carbon Steel, SS 304, SS 316, SS 316 High Polish

The Presvac Powervac is the ultimate PD Blower Wet / Dry Vacuum Loader. Operate as an air mover for dry applications or use full vacuum and extreme recovery rates for the toughest liquid, sludge and slurry jobs. The material knock out features in the Powervac debris tank minimize carry over. Heavy duty modular filtration configured to blower size and application provides superior blower protection and minimal maintenance.
